The Legendary Point of a Star System had wider coverage than Planetary Legendary Points. This would help to increase his rewards. While the Planetary Legendary Point gave an increase of five percent in rewards, the Star System Legendary Point gave twelve percent. Star Cluster Legendary Points increased his rewards by twenty percent. Star Field Legendary Points’ bonus to experience was much higher than that of Star Cluster Legendary Points, and they were extremely difficult to obtain. Universe Legendary Point is highest rank fame, the made deeds must make a stir in entire cosmos, player needs to complete very very difficult quest or makes extremely matter out of the ordinary to have the opportunity to obtain, in the edition of World Tree Civilization invasion, Universe Legendary Point has quite stably gains the channel.^{[1][2][3][4]}

Political Assets and Legendary Points had the same characteristics, but Political Assets were rarer than Legendary Points. Political Assets had a lot of benefits. The most important effects were the thirty percent increase in Favorability gain rate and Experience gain. As long as he met the requirements, he would enjoy those bonuses forever.

These two effects were applicable to the players as well. Obtaining Political Assets was extremely important. It required a lot of work and time, so these two effects were somewhat making up for that. Furthermore, the long-term rewards were higher than the expenses.

If a player had one Political Asset, it meant that for the same time they spent on missions, they would gain more Experience than everyone else. Their level would always be ahead, and they would have more excess Experience to learn and level up abilities. As this continued, the difference between them and the other players would keep growing larger.

In his previous life, Han Xiao had witnessed many guilds trying everything they could to obtain Political Assets for their players.

Medals of Honor

[Medal of Honor—Germinal Organization Slayer (A)]

[Medal of Honor – Sanctuary Owner (A)]

For some reason in [Chapter 451 \(https://supernovel.net/novel/the-legendary-mechanic/chapter-451\)](https://supernovel.net/novel/the-legendary-mechanic/chapter-451), Han Xaio is only stated to have the Germinal Organization Slayer Medal of Honor for some unknown reason. [Chapter 521 \(https://supernovel.net/novel/the-legendary-mechanic/chapter-521\)](https://supernovel.net/novel/the-legendary-mechanic/chapter-521) also omits him having the Sanctuary Owner Medal of Honor. These of course may just have been translation errors.

[Medal of Honor – Seeker of History (A)]

Obtained after completing the Hidden Planet Aquamarine Storyline Mission that he received from Hannes in Version 1.0 but completed in Version 2.0 with a high rating. ^[7]
